

How to Use Our HIGH SHINE COLLECTION

STEP 1

★ USE BOTH FOR ★
THE ULTIMATE SHINE!

STEP 2

HIGH SHINE GLOSSING TREATMENT

IN-SHOWER TREATMENT

- Instantly glossifies hair for a beautiful, mirror-like shine
 - Conditioning formula smooths & detangles
- Gently removes product buildup which leaves hair irresistibly soft, frizz-free, & radiant

How to Use

After shampooing, gently squeeze excess water from your hair and apply the High Shine Glossing Treatment (instead of conditioner) evenly from mid-length to ends. Use enough product to ensure all strands are saturated. Massage the treatment into your hair, ensuring it's evenly distributed for maximum effectiveness.

Allow the treatment to work its magic for 5 minutes. After 5 minutes, thoroughly rinse out the glossing treatment with cool water.

HIGH SHINE ANTI-FRIZZ BLOWOUT SPRAY

STYLING AID

- Heat activated spray locks in a glossy, glass-like finish
- Weightless formula helps protect hair from heat styling
 - Lasts up to 3 washes and leaves hair shiny, silky, smooth, and frizz-free

How to Use

Spray generously and evenly onto clean, damp hair. Avoid applying any other styling products while your hair is still damp; wait until after blow-drying to style. Blow-drying with tension is necessary to activate the formula.

Use a brush to keep each section taut while directing medium to high heat from your dryer down the hair shaft until the section is fully dry. For optimal results, use every 3 to 4 shampoos.
