

CALURA

CARE & STYLING

BALANCE IS THE KEY to everything in life, love and hair!

With this in mind, Oligo Professionnel developed its Osmosis Complex Technology to expertly calibrate a balance of moisture and shine between your hair and your world. With our Osmosis Complex, we have the ability to regulate and diffuse moisture. Your hair will always have the ideal moisture balance. This tried and tested technology takes the moisture from the environment and transfers it to your hair - releasing any excess moisture back into the air. OSMOSIS COMPLEX is infused with seaweed and minerals, all to help your hair and colour shine brighter, longer.

HYDRATION

GLYCERIN

Vegetable-based humectant that pulls moisture from the air straight into your hair leaving it perfectly hydrated.

VITAMIN E

Antioxidant that helps protect the hair and scalp against harmful UV rays.

CITRIC ACID

Alpha Hydroxy Acid (AHA) that balances your hair's pH level to ensure longer lasting colour. This natural ingredient is extracted from citrus fruits.

SEAWEED

Provides an essential protective barrier that locks in moisture and nutrients while controlling the speed of water intake. Seaweed also provides strength and nourishment to your hair and scalp by infusing every strand with such vitamins and minerals as calcium, magnesium, potassium, iron, Vitamin C, and B12.

NUTRITION

ORGANIC AVOCADO OIL

Protects against free radicals
Hydration and porosity equalizer

ORGANIC POMEGRANATE SEED OIL

Antioxidant
Even distribution, longevity
and ultimate shine

ORGANIC EVENING PRIMEROSE OIL

Maintains moisture in cortex
Protects the hair and scalp

ORGANIC SHEA BUTTER

Protects from heat and chemicals
Improves shine and overall
appearance
